

All Natural **TICK KILLZ**™

Effective Pest Control for  
**Ticks & Mosquitoes**

**GO GREEN!**

**Natural**  
REPELLENTS, LLC

# What is TickKillz™

- 100% All Natural product for ticks, mosquitoes, fleas and other small nuisance insects
- Controls insects on contact and repels for up to 30 days after treatment
- Liquid spray applied to your lawn, bushes and wherever insects are found

Made in the U.S.A.

# Control harmful pests

## Ticks

- Survive on the blood of mammals and birds
- Flourish in warm, humid climates
- Like sandy soil, hardwood trees, water, deer and other wildlife
- Live in high grass, leaf litter, wooded and bushy areas

## Mosquitoes

- Lay their eggs on stagnant water
- Average up to 1,000 eggs during a lifespan of 7-10 days
- Eggs usually hatch in 1-3 days but if undisturbed can last for a year
- Fly for miles and lay 100 eggs at a time

# Safe for your family, pets & the environment

- 25(b) exempt; no EPA pesticide registration number
- Perfectly safe for use around children, pets and the environment
- Will not harm beneficial insects such as pollinators, butterflies, earthworms, etc.
- Dries clear; won't stain foundation, pavers, siding, etc.

# How it works

- Controls insects on contact
- Repels insects for up to 30 days after each application
- 55.4% of TickKillz is natural **active** ingredients:
  - Cedarwood oil is an essential oil derived from the foliage, and sometimes the woods and roots, of various types of conifers, most in the pine or cypress botanical families
  - 2-Phenethyl Propionate is the ester of phenethyl alcohol and propionic acid derived from food sources like guava
  - Peppermint Oil is derived from peppermint; a hybrid mint that's a cross between water mint and spearmint
- 44.6 % of TickKillz is natural **inert** ingredients:
  - Ethyl Lactate, also known as lactic acid ethyl ester, is found naturally in small quantities in a wide variety of foods including wine, chicken and various fruits
  - Because Ethyl Lactate is easily biodegradable, it is considered to be a GREEN solvent

# How to keep your property pest-free

- Remove leaf litter
- Clear tall grass and brush around home and edges of the lawn
- Create a 3' wide barrier of wood chips/gravel around perimeter
- Mow the lawn frequently
- Stack wood neatly and in a dry area (discourages rodents)
- Keep playgrounds, decks and patios away from yard edges and trees
- Construct fences to discourage animals (deer, raccoons)
- Remove old furniture and trash from yard where ticks hide

Use TickKillz™ Regularly!

# Recommended program

- Apply every 4-6 weeks for best tick control results
- Apply every 3 weeks for best mosquito control results
- Seasonal schedule kicking off in warmer weather
- Factors to discuss with property owner:
  - Level of infestation
  - Types of insects
  - Amount of rainfall
  - Product application
  - Nature of landscape
  - Animal population, wildlife and pets
  - Water on property
  - Weather patterns
